The leading health and ancestry DNA service | [sign in](#) [register kit](#) 

 [welcome](#) [health](#) [ancestry](#) [how it works](#) [store](#)

Get to know you.

Health and ancestry starts here.

order now \$99

- Reports on 240+ health conditions and traits
- Discover your lineage, find relatives and more
- Get updates on your DNA as science advances

Watch a life-changing story.

See how our DNA test is improving lives.

A simple DNA test led to an unexpected diagnosis for a mother and daughter, changing their lives forever.

What your DNA says about you.

Find out things like if your body metabolizes caffeine quickly, or if you're at a higher risk for diabetes. The more you know about your DNA, the more you know about yourself.

Carrier status

Find out if your children are at risk for inherited conditions, so you can plan for the health of your family.

Health risks

Understand your genetic health risks. Change what you can, manage what you can't.

Drug response

Arm your doctor with information on how you might respond to certain medications.

The leading health and ancestry DNA service | [sign in](#) [register kit](#) 🛒 0

23andMe
welcome health ancestry **how it works** store

Getting started is simple.

Learn more about your health and ancestry. [order now](#)

1: Order
Start by ordering your DNA kit from our online store.

2: Register
When it arrives, be sure to register your specific bar code number so we can process your results.

3: Send
Our DNA kit includes detailed instructions on how to provide your saliva sample. Once completed, send your pre-paid kit back to us in the original box it came in.

Our technology and standards.

23andMe is a DNA analysis service providing information and tools for individuals to learn about and explore their DNA. We use the Illumina OmniExpress Plus Genotyping BeadChip (shown here). In addition to the variants already included on the chip by Illumina, we've included our own customized set of variants relating to conditions and traits that we think are interesting. Technical information on the performance of the chip can be found on Illumina's website.

All of the laboratory testing for 23andMe is done in a CLIA-certified laboratory.

Your privacy and security.

Your personalized 23andMe web account provides secure and easy access to your information, with multiple levels of encryption and security protocols protecting your personal information.

The Genetic Information Nondiscrimination Act (GINA) is U.S. federal legislation that protects Americans from discrimination (in health insurance and employment decisions) on the basis of genetic information. [Click here](#) to learn about how GINA protects your genetic privacy.
